# The Taurus Woman

Earthy, affectionate and determined, the Taurean woman combines strength of character with a deep appreciation of the pleasures of the moment.

The result? She is typically able to unite the great opposites: practicality and sensitivity.

Somehow, the Taurus woman's presence seems timeless, as if they have always been there. It's easy to see their kind nature. Taureans aren't the types to choose to run into drama; instead, they

like to focus on developing their intimate relationships. If you're looking for someone who will always have your back, look for a Taurus.

These bulls are one of the most loyal signs of the zodiac, and they're known for being caring, loving partners and friends.

When it comes to emotions and feelings, she is as deep and fertile as the earth itself. She has the steadiness to withstand stormy weather, the smarts to gather her rosebuds when they're in full bloom and the ability to squeeze pleasures out of life – moment by precious moment!
